

ALFAZ

Software Development Engineer (SDE-1) | Full Stack Developer

Udupi, Karnataka, India | +91 7406825154 | alfazappu74@gmail.com | [GitHub](#) | [LinkedIn](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Full Stack Developer and BCA graduate who has built and shipped several web apps and REST APIs using Next.js, React.js, Node.js, Express.js, and MongoDB. Most recently built a reminder tool for a local shop owner that's now part of his daily routine, replacing a paper register and a couple of Excel sheets. Looking for an SDE-1 role, remote, where I can keep working across the stack and learn from a team that ships regularly.

TECHNICAL SKILLS

Languages: JavaScript, HTML, CSS, SQL, Python, C, C#, PHP

Frontend: React.js, Next.js, Tailwind CSS

Backend: Node.js, Express.js, REST APIs, Prisma

Databases: MongoDB, MySQL, SQLite

Tools & Platforms: Git, GitHub, VS Code, Postman, Vercel, WordPress, Elementor

PROJECTS

Emission & Insurance Renewal Reminder App | *Next.js, SQLite, Prisma, Tailwind CSS* | [GitHub](#)

- Built for a local emission-testing shop owner who was tracking client renewal dates in a physical register and a couple of Excel sheets, with no easy way to see who was actually due soon.
- Used Prisma with SQLite to model client and vehicle records, and built views that show everyone due for emission or insurance renewal in the next 7 or 14 days, on one screen.
- Added a flag to mark a client as "messed" once he's followed up, so he isn't re-checking the register or messaging the same person twice.
- He now opens the app each morning instead of going through the register — it's cut down the time he used to spend cross-checking due dates by hand.

Get Me A Chai — Crowdfunding Platform | *Next.js, React.js, Node.js, MongoDB, Tailwind CSS* | [GitHub](#)

- Built a crowdfunding page where supporters can send creators a one-time contribution, similar to Buy Me a Coffee.
- Used MongoDB to store user profiles and contribution records, and put together a responsive UI that works the same on mobile and desktop.
- Kept the frontend organized around reusable Next.js components so new pages didn't mean rewriting the same UI again.

Bit-Tree — Profile Link Manager (Linktree Clone) | *Next.js, React.js, Node.js, MongoDB, Tailwind CSS* | [GitHub](#)

- Built a Linktree-style app where a user can create one page listing all their social/profile links — branded it "Bit-Tree" for my own use.
- Modeled users and their links in MongoDB, with a simple dashboard to add, edit, and reorder links.

Al-Kiswah Travels — Travel Agency Website | *Next.js, React.js, Node.js, Tailwind CSS* | [GitHub](#)

- Built and deployed a travel agency website for a client, from page layout through to going live.
- Paid attention to SEO-friendly page structure and mobile responsiveness, since most of the client's visitors were expected to land on mobile.

FREELANCE EXPERIENCE

Freelance Web Developer | 2020 – Present

- Built and delivered business websites for clients including R&N Elevators and Veebrite.
- Worked directly with clients to understand what they actually needed, then handled the build and deployment myself.

EDUCATION

Bachelor of Computer Applications (BCA)

Mangalore University — 2025 | CGPA: 6.98

CERTIFICATIONS & COURSES

- Ultimate Web Development Course — Code With Harry (Udemy)
- Python Basics — Infosys Springboard
- Communication Skills — TCS iON

ADDITIONAL INFORMATION

Open to remote roles as a Software Engineer, Full Stack Developer, SDE-1, Front-End Developer, or Back-End Developer.

Expected compensation: ₹12 LPA and above.
